Scope of the report

CEE diaspora & affiliated startups

Startups founded and scaled abroad, with (co-)founders from, and/or intellectual property grown, and/or funding secured in, the region

ICEYE ZEGO WORDWARE D.me * Docplanner IIElevenLabs

CEE-founded startups

Startups originating in the region, which moved their main place of business elsewhere as they scaled.

CEE Startups

verne starship sechland Vinted

Scope of the analysis

This report covers startups, i.e. companies designed to grow fast (see methodology section, from the CEE region. This year, the report focuses on scaleups, i.e. startups at breakout stage, which have raised €15M+ since inception.

What is a startup?

CEE countries in this report

Albania, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czechia, Estonia, Hungary, Kosovo, Latvia, Lithuania, Moldova, Montenegro, North Macedonia, Poland, Romania, Serbia, Slovakia, Slovenia, Ukraine.

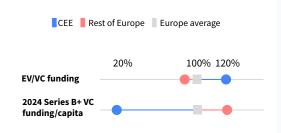

Executive summary

Strong outcomes in CEE despite historically limited capital.

CEE startups have achieved strong outcomes, despite historically limited capital. Enterprise value and VC funding have grown, but on a per capita basis (EV/capita, scaleups/capita, funding/GDP), the region remains under tapped.

CEE Scaleups are hungry for international expansion.

To scale effectively, international expansion is essential. Half of CEE scaleups relocate, often to markets like the US, where presence is essential for global expansion, or where scaling is easier, notably owing to the availability of (growth) capital.

Unlocking late-stage funding to propel CEE's next growth phase.

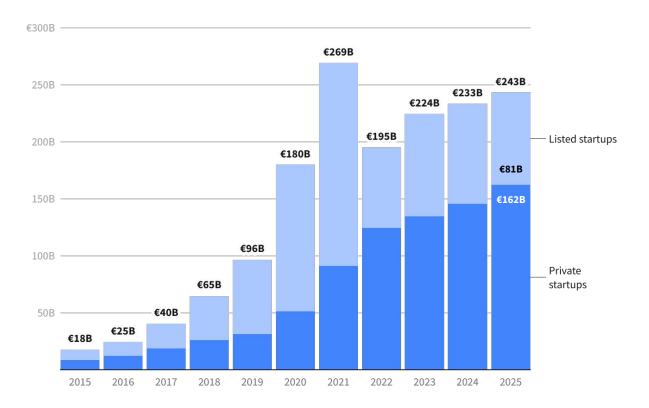

Late-stage funding remains scarce in the region, limiting systematic value creation. CEE countries vary widely in startup density, funding volume, and growth. Historically, SaaS thrived due to easier bootstrapping, while capital-intensive Deep Tech remains underdeveloped. Unlocking these barriers is key to CEE's next growth phase.

The CEE **Ecosystem is** worth €243B

In 2021 public markets saw tech stocks soar with several public CEE unicorns reaching high valuations which were subsequently partly offset owing to market correction.

Combined enterprise value of CEE ecosystem

Source: Dealroom.co

Companies which are public as of 2025 are included in the public cohort from their founding year. EV is the sum of the valuations of all startups in the ecosystem. Using estimated valuations based on most recent VC rounds, public markets and publicly disclosed valuations.

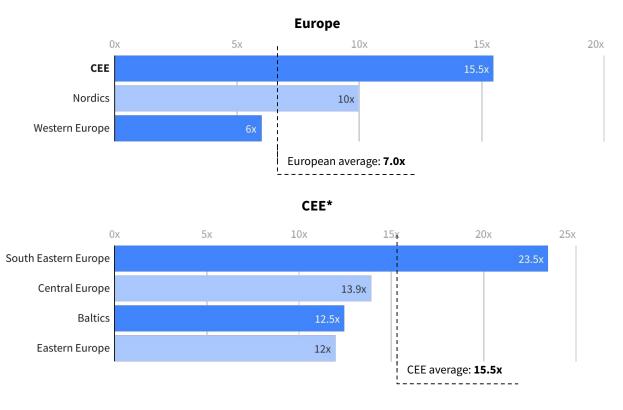

The CEE Ecosystem grew faster than Europe in the last decade

EV growth: 2015-2025 10-year overview

Source: Dealroom.co CEE is the sum of four regions South Eastern Europe: ALB, BIH, BGR, HRV, Kosovo, MNE, MKD, ROU, SRB and SVN. Central Europe: CZE, HUN, POL, SVK, Eastern Europe: BLR, MDA, UKR

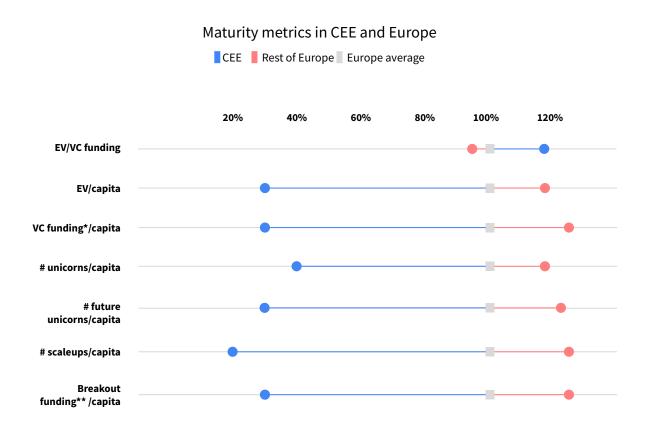

CEE creates
value in spite of
limited funding
available, but
there is much
untapped
potential to
unlock

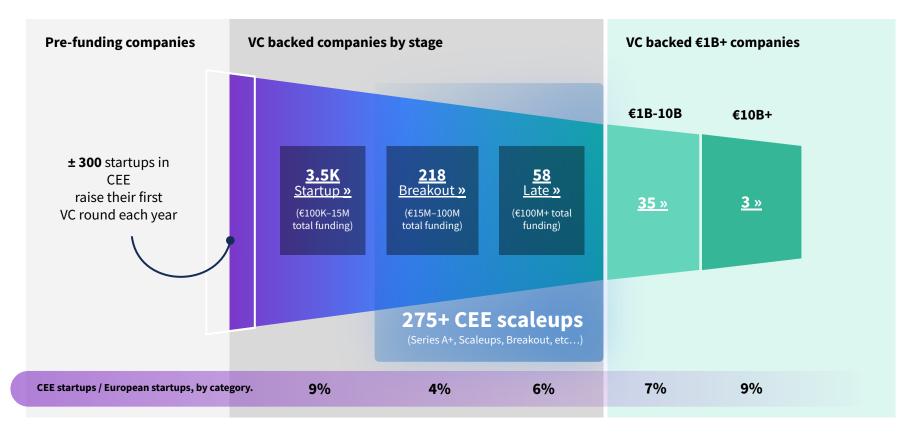

Scaleups in CEE grow faster and reach \$1BN through bootstrapping more often than their European counterparts. This is remarkable, given the limited availability of growth capital in in the past 10 years. But much more can be achieved given the underindexing of the region on most maturity metrics.

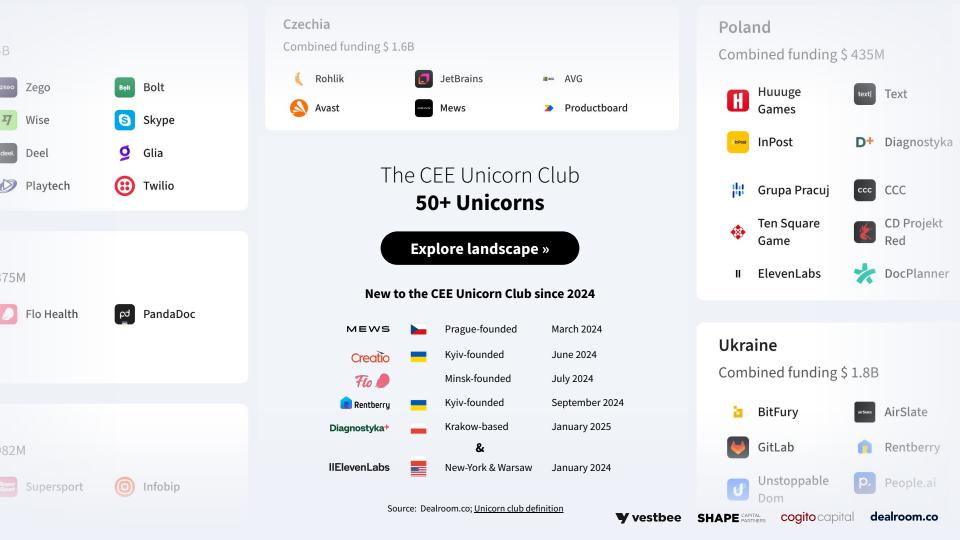

1 A Promising Scaleup Pipeline

- 2 CEE's Scaleup Hubs
- CEE's Next Growth Sectors
- The Investors Behind CEE Scaleups
- 5 Outlook

CEE has a strong pipeline of 3.8K startups, including 275+ scaleups

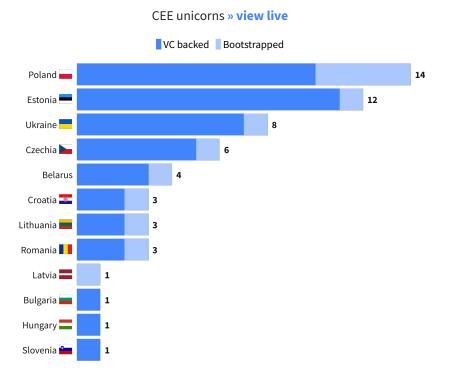

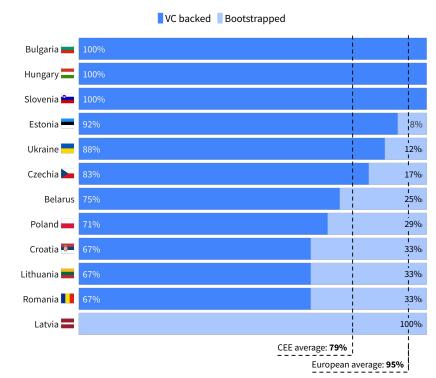

Central and Eastern Europe has produced 57 unicorns

80% of CEE unicorns were backed by VC or Growth Capital at some point

opulation

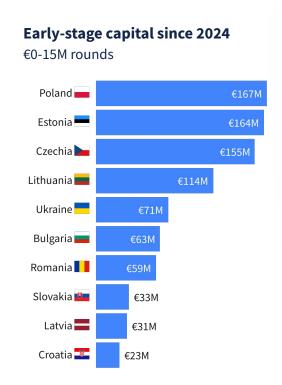

Poland leads in by ecosystem value, while Lithuania has been the fastest growing ecosystem since 2020

Estonia leads in breakout capital while Czechia (Rohlik and Mews), Ukraine (Creatio) and Belarus (Flo Health) have secured the most late stage investment since 2024

CEE Scaleups

(Series A+, Scaleups, Breakout)

Ketevan Liparteliani Europe Regional Lead, Disruptive Tech & Funds

Ukraine's tech sector has demonstrated strong resilience amidst Russia's invasion, amounting to 5% of the Ukraine GDP in 2024 with export revenues from IT services reaching \$6.7 billion in 2023.

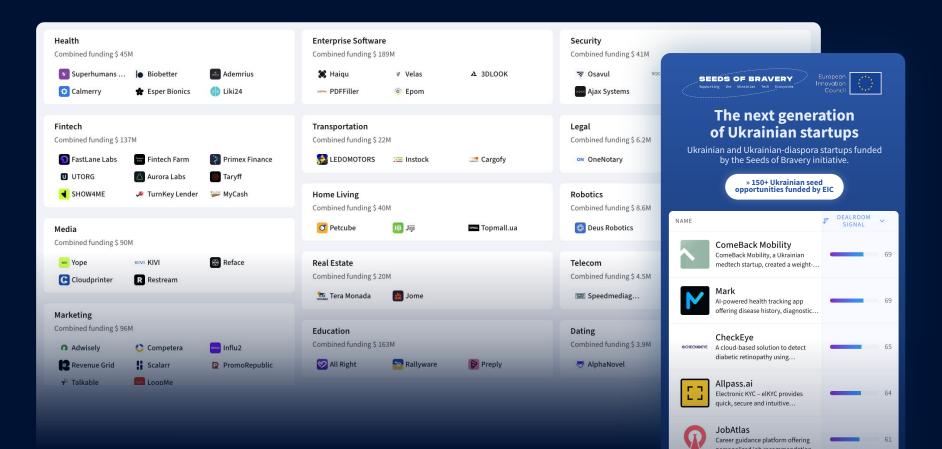

We are seeing remarkable recovery especially at Seed stage driven by high quality talent, vision and determination of Ukrainian founders as well as increased investments from early-stage investors and government programs. There have been exciting developments at late-stage as several Ukrainian startups have successfully raised follow on rounds and even achieved unicorn status (Creatio).

IFC is bullish on Ukrainian tech sector. IFC intends to invest in select early-stage VC funds that would channel money to promising entrepreneurs. As startups mature for Series A and B stage, they become eligible for direct investments from IFC's disruptive technology program to bridge the gap to growth stage funds.

Overall, IFC sees technology as one of the key components in Ukraine's post war recovery and has active investment pipeline in the sector."

50+ Ukrainian Rising Stars & Scaleups

Startups born in CEE often relocate as they scale

48% of CEE scaleups moved their HQ to another country than their country of origin.

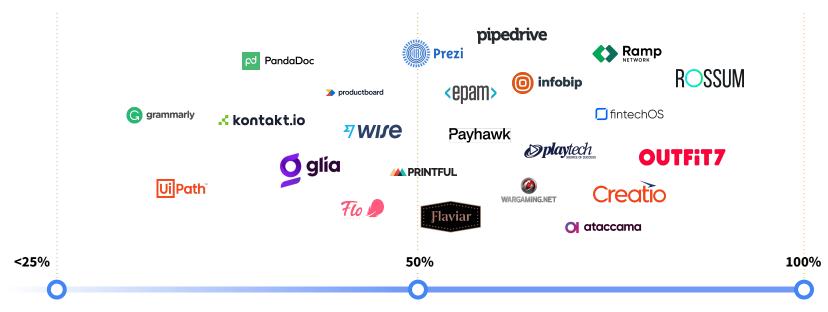

56% of CEE scaleups which relocated moved to the US, 39% moved to other European countries, including 24% to the UK.

Percentage of scaleups headquartered abroad by country of origin

Country	Number of relocated scaleups	▲ % of relocated scaleups
Slovakia	0-5	27%
Czechia	10-15	37%
Romania	5-10	38%
Lithuania	5-10	38%
Poland	15-20	38%
Hungary	5-10	40%
Bulgaria	5-10	50%
Estonia	25-30	54%
Croatia	5-10	64%
Ukraine	25-30	>90%

Although many successful CEE scaleups move their HQ abroad, they tend to keep a strong presence in the region

Selected CEE-born scaleups & unicorns with Headquarters abroad

Share of the workforce based in Central Eastern Europe.

Sylwester Janik General Partner cogito capital

"Recognizing that international growth is key to scaling effectively, many CEE tech companies expand globally early.

Enterprise software companies in the region leverage CEE's strong development and IT expertise. While some build their ventures in CEE, most prioritize expansion, particularly into the US, the world's largest enterprise software market. Many entrepreneurs move to global hubs like London, the Bay Area, or New York.

CEE scale-ups take two main approaches: some retain core development in the region while establishing a US presence, while others relocate early. Regardless of the path, the goal remains the same - scaling globally and securing funding for growth and exits.

Expanding abroad doesn't mean leaving CEE behind. These companies bring back global expertise, strengthening the region's tech ecosystem and driving innovation.

At Cogito Capital, we specialize in supporting such companies. With teams in Warsaw and New York, we bridge Europe and the US, providing hands-on support as our portfolio companies scale in the US market."

CEE: a key defence tech hub

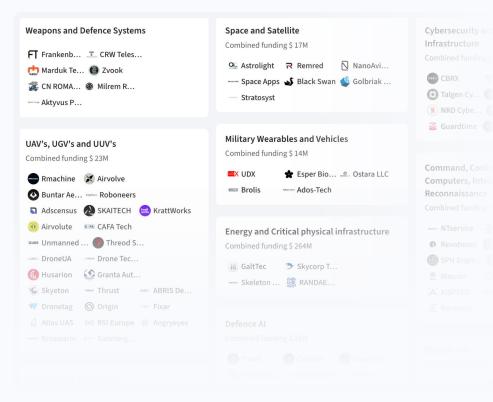

In response to the shifting security landscape following Russia's actions in Ukraine, countries in the CEE region have significantly bolstered their defense capabilities through targeted investments, military upgrades, and regional cooperation.

There are now **over 100 CEE-based defense and dual-use startups**, many actively deployed in Ukraine. Most of these startups are still early stage with 37% founded since 2020 and 90% are still at Seed and Series A stages.

Governments have also expanded defense budgets, with Poland increasing spending to over 4% of GDP in 2024 to procure advanced systems like HIMARS, Abrams tanks, F-35 jets, and integrated air defenses. The Czech Republic and Slovakia are modernizing their equipment, enhancing cybersecurity, and conducting joint exercises, while Hungary's Zrínyi 2026 program focuses on force expansion and domestic arms production. Meanwhile, the Baltic states are developing the Baltic Defense Line—fortifications along their borders with Russia and Belarus, including bunkers and anti-tank ditches, to reinforce regional security.

Regional collaboration is also intensifying through platforms such as the Visegrád Group and the Three Seas Initiative, while growing defense-focused startups—particularly in unmanned systems and battlefield technologies—are supported by new investment funds. These combined efforts position CEE as a critical pillar of NATO's eastern flank.

"To safeguard European sovereignty and competitiveness, it is crucial to provide local funding to CEE scaleups at their growth stage. This is our mission. Let's shape the future together.

CEE is proving itself as a powerhouse of innovation, resilience, and global ambition. Despite economic headwinds, the region continues to produce world-class entrepreneurs who build and scale transformative companies. With deep technical talent and a thriving scaleup ecosystem, CEE's impact on the global tech landscape is undeniable.

At SHAPE Capital Partners, we are committed to fueling this momentum, with a strong focus on B2B SaaS scaleups at the breakout stage – ready for accelerated growth. While we invest across Europe, our deep ties to CEE drive us to support visionary founders during their most critical growth stages, helping bridge the growth-stage funding gap. We believe CEE is not just an emerging market but can be a launchpad for global category leaders, ensuring European tech sovereignty.

Beyond capital, we partner with bold entrepreneurs to turn groundbreaking ideas into sustainable success stories. As today's innovators become tomorrow's trailblazers, we remain dedicated to shaping the future of CEE's thriving scaleup ecosystem—together."

66 A mental shift is needed to ensure we don't miss this pivotal moment.

CEE is no longer just an exciting place for early-stage innovation—it is home to serious contenders in the global race for transformative technologies. The region can and must be a powerhouse where disruptive technologies scale-up, create high-value jobs, and deliver strong returns for investors willing to back them.

Late-stage capital is in high demand, but local LP involvement remains marginal. Private capital exists in CEE, but it is not sufficiently supporting the risk-takers and high-growth businesses that will define the region's future. This must change.

Local stakeholders must step up, engage with VCs, and support the next wave of CEE success stories. Do not be afraid to invest with local VCs—this is how strong ecosystems are built. More daring incentives can help, but the real impact will come from a shift in mindset—one that embraces long-term value creation and global ambition, with everyone onboard.

At the European Investment Fund, we are committed to driving this transformation. Through initiatives like the European Tech Champions Initiative, we are unlocking capital, mobilizing private investors, and ensuring that Europe's most ambitious companies have the late-stage funding they need to scale and thrive. The moment is now—CEE must seize it."

CEE investors landscape

View 1.9K global investors active in CEE »

Ewa Chronowska

y vestbee

"While VC as an asset class has gained recognition among LPs, CEE remains heavily reliant on public capital, and continues to lag behind developed ecosystems.

Over the past decade, the CEE startup ecosystem has evolved from a fragmented and undercapitalized landscape—largely dependent on government and EU-backed initiatives—into a dynamic innovation hub with a strong talent pool. The success of companies like <u>UiPath</u>, <u>Rohlik</u>, <u>Bolt</u>, <u>Vinted</u>, and <u>Pipedrive</u> has validated the region's potential, attracting increased interest from global VCs such as Sequoia and a16z.

However, after the period of abundant capital, 2023-2024 marked a sharp decline in funding and deal activity, driven by broader market volatility, rising interest rates, and increased investor caution. At the same time, **the region continues to face a shortage of growth-stage funding**, restricting its ability to systematically scale companies into global category leaders.

As the market recalibrates, closing these capital gaps, driving more successful exits, and easing regulatory constraints will be critical for the CEE ecosystem to sustain its progress and transition from an emerging player to a fully integrated part of the global innovation landscape."

Methodology & Definitions

What is a startup?

Companies designed to grow fast founded in the information age (since 1990). Generally, such companies are VC-investable businesses. Successful startups reach go on to raise significant capital and become **Scaleups** at **Breakout** (€15M-100M funding), and/or **Late** (€100M+ funding) stages. A handful become very big (e.g. €/\$1B+ valuation).

What is a startup?

What is a unicorn?

Unicorns are (former) startups that reached €/\$1B valuation or exit at one point in time.

What is a Unicorn?

Industries, Segments

Dealroom's Intelligence Unit has developed a proprietary technology taxonomy that acts as a foundation and helps navigate existing and emerging technologies. We welcome suggestions and feedback at support@dealroom.co.

Dealroom taxonomy

Underlying Data

Dealroom's proprietary database and software aggregate data from multiple sources: harvesting public information, user-submitted data verified by Dealroom, data engineering. All data is verified and curated with an extensive manual process.

The data on which this report builds is available via app.dealroom.co. For more info please visit dealroom.co or contact support@dealroom.co. Data for this report was taken in Q1 2025.

Venture Capital, Investors

Investment are referred to by their round labels such as Seed, Series A, B, C, ... late stage, and growth equity. VC investments exclude debt, non-equity funding, lending capital and grants.

Unless otherwise mentioned, rounds under €15M are considered Early. Those rounds €15-€40M, and €40-€100M are considered Breakout, Rounds above €100M. are considered Late.

Regional breakdown & startup locations

"Europe" includes countries in geographical Europe, except Russia and Türkiye. "CEE" includes Poland, Czechia, Slovakia, Hungary, Slovenia, Croatia, Romania, Bulgaria, Lithuania, Latvia, Estonia, Belarus, Ukraine, Moldova, Serbia, Montenegro, Bosnia & Herzegovina, North Macedonia & Albania. Startups founded and/or based in CEE are included in this report, even if HQ is currently located abroad.

Artificial intelligence

In this report, startups considered as AI core include startups which:

- 1) develop computing infrastructure focused on AI, such as AI chips and processors or specialized cloud providers for Al.
- 2) develop AI models for other companies, such as generative AI foundational models.
- 3) develop Machine Learning Operations tools (MLOps) to: prepare, annotate or generate data for AI; train and optimize/fine-tune AI models; deploy and monitor AI performances.
- 4) offer products and services which have AI as their core feature (e.g. autonomous mobility and AI drug discovery, among others).

Global startup and venture capital intelligence platform

Dealroom.co is the foremost data provider on startup, early-stage and growth company ecosystems in Europe and around the globe.

Founded in Amsterdam in 2013, we now work with many of the world's most prominent investors, entrepreneurs and government organizations to provide transparency, analysis and insights on venture capital activity.

cogito capital

Cogito Capital Partners: Empowering Deep Tech Growth

Cogito Capital Partners is a venture capital firm based in Warsaw, Poland and New York, USA, investing in later stage/early growth tech B2B companies ("scale-ups") with Central European footprint and global expansion potential.

With a focus on Enterprise Software, Fintech, and Healthtech, we partner with exceptional teams to unlock their potential and transform industries worldwide.

We act as a bridge between Europe and the USA for our portfolio companies, providing hands-on support as they expand into the US market.

SHAPE CAPITAL PARTNERS

SHAPE Capital Partners: Closing the Growth Stage Funding Gap in CEE

SHAPE Capital Partners is an independent growth stage investment firm based in Vienna, Austria, focused on B2B SaaS scaleups at the breakout stage, with investments ranging from €5M to €15M across Europe, with a special emphasis on Central and Eastern Europe (CEE).

Our deep industry expertise in Fintech, Healthcare, Mobility & Transport, and Energy & Industry, combined with our extensive network and strategic support, offers more than just capital—we provide hands-on guidance and connections to fuel sustainable growth.

y vestbee

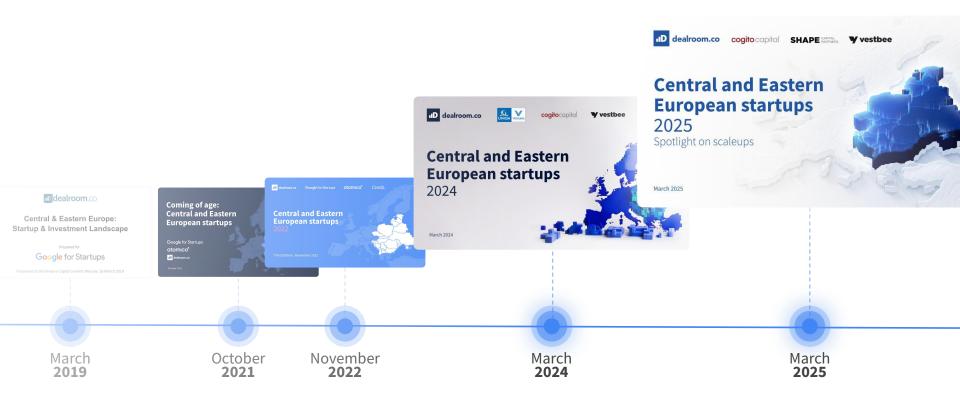

All-in-one platform for startups, VCs, accelerators & corporates

Vestbee is Europe's leading platform, facilitating connections between startup founders and a global networks of investors, VC funds, accelerators, and corporates.

Our mission is to drive growth and empower the startup and VC ecosystem through a vibrant community and an extensive suite of tools and infrastructure designed to streamline the fundraising process, enhance deal sourcing, and support the management of open innovation, acceleration programs, and startup-investor matchmaking.

Collaborating with over 35,000 companies and investors, including leading global brands like Amazon Web Services and HubSpot, we help tech businesses to succeed.

This is the fifth edition of the CEE Startups report series.
